Lake Superior Ballroom L, M

Session: "ITLS-International Trauma Life Support"

Thursday, January 19, 2017

Presenter(s): Geoff Galaski

8:00 am - 5:00 pm

Session Description: The ITLS Course is to prepare emergency health care providers to knowledgeably and skillfully perform the rapid assessment, resuscitation, packaging, stabilization and transport of the trauma patient. The course includes lectures and interactive skill stations to provide for the application and integration of knowledge and skills to case based scenarios. Prior study of the text is required.

Session Objectives:

- Students will demonstrate the proper steps in managing a trauma patient as it relates to the ITLS Primary Survey, Ongoing Exam and Secondary Exam.
- Students will demonstrate key patient management skills including airway management, rapid extrication and discuss the new technology available in treating trauma patients.
- Students will demonstrate key concepts of ITLS including spinal trauma and patient-centered spinal motion restriction.

Lake Superior Ballroom N, O

Session: "AMLS-Advanced Medical Life Support"

Thursday, January 19, 2017

Presenter(s): Rosemary Adam

8:00 am - 5:00 pm

Session Description: This two day program is sponsored by the National Association of EMTs and meets many of the refresher requirements for EMS

Session Objectives:

- Apply knowledge of anatomy, physiology and pathophysiology to the comprehensive medical assessment process, using clinical reasoning to determine the field impression and differential diagnoses.
- Based on the assessment and process above, the participant will formulate a management strategy for a variety of medical emergencies presented in the program via case scenarios.

Gooseberry Falls Room

Session: "Developing a Recruiting and Retention Plan for Your Volunteer Service"

Thursday, January 19, 2017

Presenter(s): Mark Griffith, Neal Stocker, Stan Stocker, Marty Sullivan, Marvin Sullivan and Brad Dinniel

8:00 am – 12:00 pm

Session Description: Whether you need to maintain your numbers, or bring your service back from the brink of extinction, this 4 hour course will allow participants to formulate the basics of a recruiting and retention plan specific to their needs. This highly interactive and engaging course will allow students to apply their ideas using a systematic and academic approach, and provide focus to their local efforts in keeping a hearty and happy volunteer base.

Session Objectives:

- Students will be able to identify all service stakeholders, and be able to engage them effectively in meeting their service goals

Session: "Pediatric Simulation Lab"

Thursday, January 19, 2017

Presenter(s): Al Benney, James Levi, Dr. Paula Kocken, and Tracy Larsen

8:00 am – 12:00 pm

Session Description: This training is four hours of hands-on education covering the topics of children with special healthcare needs, pediatric emergency airway, medical and trauma.

Session Objectives:

- To improved knowledge and proficiency when treating pediatric patients
- To recognize and use appropriately sized pediatric equipment
- To demonstrate airway management skills on pediatric patients

Session: "Assisting Individuals in Crisis"

Thursday, January 19, 2017

Presenter(s): Kathryn Abram

8:00 am – 5:00 pm

Session Description: Crisis Intervention is not psychotherapy; rather it is a specialized emergency mental health intervention, sometimes called "emotional first aid." This program is designed for anyone who wants to increase their knowledge of one-to-one crisis intervention techniques.

Session Objectives:

- Participants will learn to understand the mechanics of stress caused by a critical incident and how to identify and manage this stress
- Participants will learn and practice basic crisis communication techniques
- Participants will learn the safer-R model of protocol for one-to-one interventions
